# 99 MORE BUILDZI® TOWERS

## HOW TO PLAY

### You know how to play BUILDZI, right?

Well, all that's still the same, but now we've made five new types of Tower Cards.

So put all the BUILDZI blocks in a pile in the center, shuffle all the new Tower Cards, and deal one Tower Card to each player.

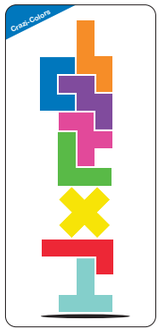

Someone says, "Go" then every-one flips over their Tower Card and quickly grabs blocks from the center.

First player to build their tower and shout "BUILDZI" wins!

Deal out new cards and play again and again and again.

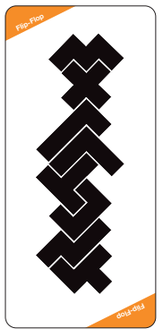

## FIVE NEW TYPES OF TOWER CARDS

### Crazi-Colors

Look closely! We've changed the colors of the blocks on these cards so they don't match the actual blocks. So you gotta grab and build by the shape, not the color!

### Flip-Flop

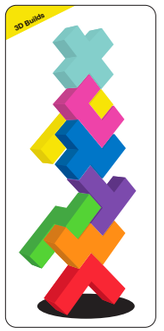

No colors to help you out, but you can build these towers either way! Right-side-up, or turn the card upside down and build it the other way. Whichever you think is faster!

### Build by Numbers

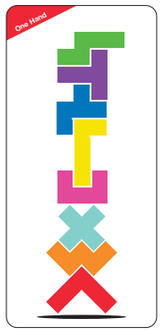

Easy as 1, 2, 3... Build these towers any way you want as long as 1 is the first block placed, then 2, then 3, all the way up to 8 as the last block placed on the tower! (Remember, no flat stacking.)

### 3D Builds

You don't need 3D glasses for these towers. But you do need to quickly build in a whole new dimension!

### One Hand

Real straight-forward here, except for one little twist. You can only use one hand! Left or right, doesn't matter to us, just not both.

NOTE 1: Yes, players will likely have different types of towers to build. But they're all simple and fast, and each has its own fun little wrinkle.

NOTE 2: Tumbling blocks may cause small dings in wooden tables, so you might want to use placemats to build on.

## HERE'S A TWIST

To occasionally change the game up, you can also go through the deck of Tower Cards and choose one type for all players to build.

Let's say, for example, you decide on 3D Builds. Hand out a 3D Build card to everyone, then say "Go!" No flipping over the card, just start building.

And when everyone is playing with a Flip-Flop card, here's a fun thing to do...

Someone says "Go" and everyone races to build their tower. When they finish building the right-side-up tower, they have to quickly turn the card upside down and then build it the other way. First player to build both towers wins!

## EVEN MORE WAYS TO PLAY

### You don't need any Tower Cards to play these games

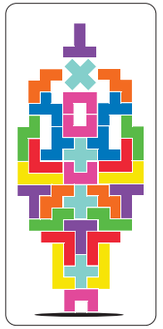

1. Be the first to build an eight-block tower using any blocks you want.
2. Be the first to build an eight-block tower with gloves or mittens on.
3. Who can build an eight-block tower the fastest? Only one player builds at a time while another player times them using a smartphone.
4. Who can build **four** eight-block towers the fastest? Only one player builds at a time while another player times them using a smartphone.
5. Who can build a 16-block tower the fastest? One player at a time builds. Another player uses a smartphone to time them.
6. And here's a bit of a wild one where you'll need a few sets of chopsticks. Be the first to build an eight-block tower using chopsticks and not your hands.

And that's **99 More BUILDZI Towers**. (Well, actually, as many of you have probably figured out by now, it's a bit more than 99. But 99 just had a good ring to it, so we went with that.)

## CHALLENGE BUILDS ON OUR SITE

**And for when you don't want to play a speed game, but just want a simple, fun challenge, go to our website tenzi.com/buildzi-challenge for some really crazy builds. Good luck!**

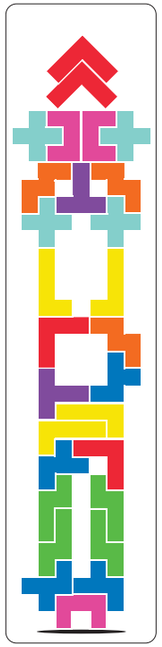

### All 32 Builds

Yep, that's right, we've used all 32 blocks in these towers. And yep, they do make a very loud noise when they all come crashing down!

### Skyscraper Builds

Every bit as challenging, but just a little bit taller.

With all the endless ways these BUILDZI blocks can fit together, we're sure you'll build some pretty incredible towers. And we'd sure love to see them. So please post to social media (#BUILDZI) or send them our way and we'll post them on our website. Thanks! -- Kevin & Steve
